FEATURES

Powerful, simple tools, now and in the future

Key **FEATURES** and tools

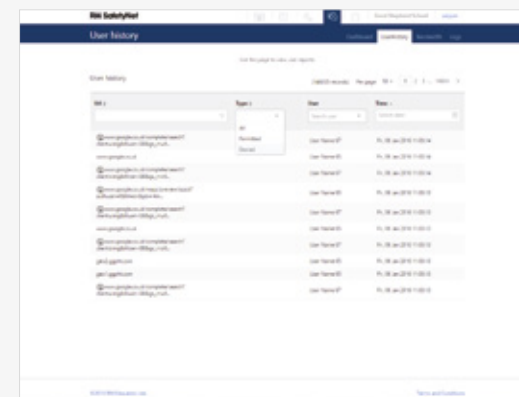

- Cloud hosted web filtering – no equipment for your school to manage, install or update
- Illegal sites on the Internet Watch Foundation (IWF) black list blocked
- Illegal extremist content blocked
- Access to pre-compiled filter lists
- Ability to create custom lists
- Sync with your active directory to apply filter rules to individual users and groups
- SSL filtering inspection for Google services
- Enforced SafeSearch mode in Google and Bing
- Prevent pupils searching for specific terms or words
- Bandwidth graphs to view trends and monitor usage across school year
- Content filtering assesses any unknown web page to establish it's suitability
- Create time based rules:

- Make changes to filter rules from anywhere
- Filter BYOD or guest devices using transparent proxy

Coming **SEPTEMBER** 2016

- **User reporting** – review what individual users have been accessing online, with the ability to refine by date and websites permitted or blocked.

Coming **AUTUMN** 2016

- **School trends** – view most visited websites, top search terms, top users by blocked sites to establish trends across your school and identify any intervention needs.

Coming **WINTER** 2016

- **Alerts** - receive automatic email alerts when a user attempts to access something inappropriate, or if they search for a worrying subject for example suicide or self-harm.
