

HIDE MESSAGES AND COMMENTS YOU DON'T WANT TO SEE

Navigate to Settings > Privacy > Hidden Words

With Hidden Words, you can:

- Hide **message requests*** and **comments** that contain offensive content
- Create a custom list to hide other words, phrases, or emojis

**Reminder: This control will only apply to message requests, and not messages from your friends or people you follow.*

Hidden message requests live in the Requests section of your DM inbox

You'll see **Hidden Requests** at the bottom of your **Message Requests** folder

If you open the Hidden Requests folder, **messages will be obscured unless you choose to view them**

If you do choose to view a hidden message, you can **report, delete, or accept** it
